Strategy Offerings*

All-Cap Advantage

The All-Cap Advantage Strategy (ACA) is a long-term, fundamentally-driven investment approach whose goals are to generate an attractive risk-adjusted rate of return and to outperform the Russell 3000 and S&P 500 indices over time. The strategy's primary tenet is that a stock represents an ownership interest in a business. Our goal is to identify quality businesses and to buy their stock at a discount to our estimate of its intrinsic worth. ACA portfolios typically hold 40-60 positions. The strategy's long-term orientation results in low portfolio turnover and tax efficiency, making the strategy particularly attractive for taxable investors.

Dividend Value

The Dividend Value investment process is based on the belief that a portfolio of stocks with above-average dividend growth plus an above-average dividend yield should outperform the broader market and experience less downside volatility over a full market cycle. An increased dividend is the most meaningful evidence of management's confidence that a company has reached a higher sustainable level of future cash earnings and operating cash flow. Our research suggests this is a highly reliable indicator that management's optimism is well-founded. As a group, companies with a commitment to pay out a meaningful portion of cash earnings as dividends typically impose more financial discipline on management and are indicative of successful businesses that build shareholder value.

Fixed Income

Tradition's Fixed Income portfolios are actively managed to outperform a benchmark index over the long-term while mitigating risk. We accomplish this through interest rate anticipation, sector allocation and security selection. This strategy is appealing to investors who require higher yields and can accept moderate price volatility. All maturities and sectors are utilized in this strategy as is duration management. Typical duration for a core portfolio ranges between 3 and 7 years depending upon our outlook for the direction of interest rates. Yield curve management is utilized as well. The overall portfolio quality is typically AA-. Fixed income portfolios are constructed to meet specific client needs and mandates.

*Tradition also offers balanced portfolios and other fixed income portfolios that can be customized for specific client objectives.

Tradition All-Cap Advantage Strategy

- ❑ “Best Ideas” portfolios
- ❑ Strategy seeks alpha across the entire capitalization spectrum
 - Bottom-up stock selection from focus research list
 - Capitalization exposure will vary over time depending on valuations
- ❑ Research-driven, contrarian insights
- ❑ Consistent long-term track record of alpha generation
- ❑ Consistently high risk-adjusted returns
- ❑ Achieved a 4-star rating from Morningstar (SMA large blend peer group)

Historical Market Cap Distribution

As of December 31, 2016

Tradition's Investment Philosophy

A Proven Approach

- ❑ Markets are inefficient in the short term; fear and greed create opportunities for the longer term investor
- ❑ Share prices often fluctuate above/below their intrinsic value (i.e., our estimate of a company's economic worth)
- ❑ Fundamental research uncovers the greatest opportunities to capitalize and to manage risk
- ❑ We invest only if our proprietary research suggests a stock is undervalued
- ❑ This approach offers a higher probability of success

Tradition Capital Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Tradition Capital Management, LLC has been independently verified for the periods October 17, 2000 through December 31, 2015. A copy of the verification report(s) is/are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards through December 31, 2014. Verification does not ensure the accuracy of any specific composite presentation. The All-Cap Advantage composite, previously known as Institutional All-Cap and renamed in December 2013, is made up of all equity discretionary equity accounts with the objective of all-cap and with a minimum account level of \$ 200 thousand. Prior to 2013 the minimum was \$500 thousand. Prior to January 1, 2007, the minimum account size for this composite was \$1 MM. For comparison purposes is measured against the S&P 500 and Russell 3000 indexes. The S&P 500 and Russell 3000 index returns are before taxes. Prior to October 2005 the composite was compared against the Wilshire 4500 and prior to Oct 2006 it was compared to the Russell 1000 Value. The account must have been managed for at least a full calendar quarter and a month during the relevant time periods. Tradition Capital Management, LLC is an SEC (Securities and Exchange Commission) registered investment advisor. The firm maintains a complete list and description of composites, which are available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results and the performance of a specific individual client account may vary substantially from the performance results reflected above. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees. The net performance results reflect time-weighted rates of return, the re-investment of dividends and other account earnings, and are net of applicable account transaction and custodial charges, as well as Tradition's management fee. Gross performance includes all of the aforementioned criteria except for the deduction of Tradition's management fee. Net of fee performance was calculated using actual management fees. In addition to a management fee, some accounts pay an all-inclusive fee based on a percentage of assets under management. Other than brokerage commissions, this fee includes portfolio monitoring, consulting services, and in some cases, custodial services. Tradition's investment management annual base fee schedule is as follows: 1.0% on the first \$5MM, 0.8% over \$5MM. Actual investment advisory fees incurred by clients may vary. Gross returns of wrap accounts are reduced by all transaction costs and other expenses incurred; net returns for all accounts have been reduced by all actual fees incurred. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor. For purposes of this composite, we've included assets in fee-based commissioned accounts as wrap assets. Portfolio and composites will be revalued if external cash flow is greater than 10%. The annual composite dispersion is an asset-weighted standard deviation calculated when there are more than five accounts in the composite for the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request by contacting Tradition through their website at www.traditioncm.com. If an account has a 15% of total portfolio withdrawal/deposit, over a 2 month period, account will be taken out of the composite at the end of the month preceding the withdrawal/deposit and won't be put back in for 3 months. As of 1/1/2009 the cash flow policy changed from 15% to 25%. The All-Cap Advantage composite was originally created by Haven Capital Management on April 1, 1983. Haven Capital Management joined Tradition Capital Management in March 2009, the shaded area above reflects the composite levels at Haven Capital Management. Performance results shown prior to January 1, 2002 have undergone an abbreviated firm-wide verification by a predecessor verifier in accordance with Standards in effect at that time, and are included as part of a completed disclosure presentation. Results for the full historical period are time weighted. From January 1, 1984 through December 31, 1992, composite results were a simple average; the Firm was not in compliance during this time period. Beginning January 2007 a non-fee paying account is included in this composite: In 2007, 7.7%; in 2008, 95% of the composite is comprised of a non-fee paying account. As of June 2009, no non-fee paying accounts are in composite. Strategy assets is for supplemental purposes only. The assets include all accounts that are managed under the All-Cap Advantage strategy whether or not they qualify for the composite. On December 31, 2013 Tradition Capital consolidated variations of their All-Cap strategy into one composite. **Partial year from Oct 2000 to Dec 2000. On August 31, 2015, Candor Wealth Advisors merged into Tradition Capital Management.
